

2019-2020 Snow Plowing Schedule

The City of Fairbanks Public Works Department will be addressing the clearing of snow from the roadways within the City limits on a rotating schedule as noted below. This is an approximate 4-6-week turn around. If there is significant additional snowfall before the rotation ends, we will address the *emergency areas and main thoroughfares immediately and then return to the residential rotation where we left off. In a typical winter snow will be removed and hauled away twice in neighborhoods during the day. In the Spring as much hard pack will be removed before breakup. The night shift will address the Downtown Core Area.

Below is the projected rotating snow removal schedule for RESIDENTIAL areas (day shift):

1. EM Jones, South Westgate, Executive Park, Hilton Park, Westgate, Taku and Doyon Estates
2. Hamilton Acres, South, Hamilton Acres North, Shannon Park
3. Aurora, Johnston, Brandt, Slaterville, and Graehl Subdivisions
4. Weeks Field Memorial Park, Mooreland Acres
5. Island Homes, East of Noble (Townsite Subdivision), Walden Estates, Arctic Park
6. Lemeta, Royal Court
7. Rickert, Gateway, Bjerremark

Downtown Core Snow Removal Guidelines

- Snow removal on downtown Core streets will only be done by a night crew
- The hiring of a night crew is dependent on available budget and snow accumulation and availability of temporary operators
- A night crew first task is to clear emergency routes, then downtown
- Once a night crew is hired, more frequent snow removal operations will occur in the Downtown Core warranted by snow accumulation
- In a typical winter snow will be removed 3-5 times in the Downtown Core
