

## 2020-2021 Snow Plowing Schedule revised

The City of Fairbanks Public Works Department plows and removes snow in neighborhoods within the City limits on a rotating schedule as noted below. This is an approximate 4-6-week turn around. If there is significant additional snowfall before the rotation ends, we will address the \*emergency areas and main thoroughfares immediately and then return to the residential rotation where we left off. In a typical winter, snow will be removed and hauled away twice in neighborhoods during the day. In the Spring, as much hard pack will be removed before breakup. The night shift will address the Downtown Core Area (First Avenue-Fifth Avenue between Barnette and Noble Streets).

Below is the projected rotating snow removal schedule for RESIDENTIAL areas (day shift):

1. Hamilton Acres South, Hamilton Acres North, Shannon Park
2. Aurora, Johnston, Brandt, Slaterville, and Graehl Subdivisions
3. Weeks Field Memorial Park, Mooreland Acres
4. East of Noble (Townsite Subdivision)
5. Rickert, Gateway, Bjerremark
6. EM Jones, South Westgate, Executive Park, Hilton Park, Westgate, Taku and Doyon Estates
7. Lemeta, Royal Court

**\*\*Island Homes, Walden Estates, Arctic Park\*\*** in these neighborhoods snow is only removed-no plowing due to narrow streets and on-street parking and will be inserted in the rotation above as needed

**Due to garbage collection days, snow crews may be deployed to other locations outside of the rotation schedule.**
